

CompTox Chemicals Dashboard

Antony John Williams

williams.antony@epa.gov

Center for Computational Toxicology and Exposure, US-EPA, RTP, NC

February 3rd 2021 : Board of Scientific Counselors meeting

The views expressed in this presentation are those of the authors and do not necessarily reflect the views or policies of the U.S. EPA

- **A publicly accessible website** delivering access:
 - ~883,000 chemicals with related property data
 - Experimental and predicted physicochemical property data
 - Experimental Human and Ecological hazard data
 - Integration to “biological assay data” for 1000s of chemicals
 - Information regarding consumer products containing chemicals
 - Links to other agency websites and public data resources
 - “Literature” searches for chemicals using public resources
 - “Batch searching” for thousands of chemicals

Explore the wealth of data and features available in the CompTox Chemicals Dashboard with these instructional videos narrated by EPA scientists.

General Chemistry and Search Capabilities

Conclusion

- Dashboard access to data for ~883,000 chemicals (and growing)
- Data aggregation for ALL data sources continues unabated
- Flexible search capabilities continue to expand release-to-release
- Expansion of new modules continues with prototype development
- The application is being totally rearchitected at present to also develop a Public API

Acknowledgments

- Contact: Williams.Antony@epa.gov
- Feedback and follow-up is welcomed! Your questions help
- The dashboard is based on the efforts of many more team members than us. Many collaborators provide data also.
